

AQUABASIN™

AquaBasin™

Decorative Fountains Made Easy!

Water features provide homeowners with a unique and creative way to decorate their outdoor living space. Many of these homeowners desire the soothing sounds of running water, but are just not ready for a pond or simply can't afford one. Aquascape's new AquaBasin™ system, paired up with our hand-crafted decorative line, provides the perfect solution for capitalizing on these small, entry-level water features.

Aquascape's AquaBasin™ is designed to take the guesswork out of installing RimRock Spires™, hand carved stone, brass fountains, and bubbling urns. The AquaBasin™ is a great way for any contractor or homeowner to quickly and easily install this popular style of water feature.

AquaBasin™ Features:

Professional grade, high-density polyethylene, double walled structure gives it superior strength and weight distribution.

18" diameter recessed middle area allows for larger pieces to be backfilled in order to increase stability.

Extra large water storage area holds up to 75 gallons of water, which means less topping off and can accommodate pumps all the way up to 4000 gallons per hour.

2-9" x 12" pump access panels to allow multiple pumps and easy access for maintenance.

Pre-drilled hole in the center that makes it easy to hook up plumbing.

Measuring out at 45" x 45" x 14", the AquaBasin™ is ideal for catching the splash of some of those larger pieces.

Octagonal shape for maximum strength when backfilling and positioning decorative pieces.

Choose from four Ultra Pump kits. Each kit includes the pump and plumbing you need to get the fountain running. (Sold separately. See below.)

Why only appreciate your water feature during the day? Adding lights can dramatically change the look of any fountain. See page 38-39.

#98134 AquaBasin™ Case: 6, Unit Weight: 50 lbs.
